Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I (claims 1-6) in the reply filed on September 1, 2004, is acknowledged. The traversal is on the ground(s) that (1) MPEP 806.05(g) is directed to restriction between apparatus and product made, not product and process of making, and (2) it is not possible to assemble the claimed sliding structure using the method taught in U.S. Patent No. 5,286,237. This is not found persuasive because of the following:

(1) Although the previous examiner incorrectly identified the MPEP citation as 806.05(g), the claims may still be restricted as set forth in 806.05(f). As required by that section, the previous examiner set forth a different process by which the claimed sliding structure can be made.

(2) A simple statement that it is not possible to assemble the claimed sliding structure in the manner suggested by the previous examiner is insufficient without supporting arguments or evidence. However, the present examiner wishes to set forth another method in which the claimed sliding structure may be assembled: by using a fixture to position the rolling elements about the exterior of the rotor and subsequently sliding a retainer over the so-positioned rolling elements.

The requirement is still deemed proper and is therefore made FINAL. Upon further review of the elected claims, it has been determined that a further election of species is required prior to examination, as set forth below.

Art Unit: 3726

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: The embodiment depicted in Figure 7 (readable on claims 2 and 3).

Species B: The embodiment depicted in Figure 8 (readable on claims 4 and 5).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 6 appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3726

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
